General Policy Statement on Health and Safety Management

Faculty of Engineering, Computing and Mathematics’ Workshop fully endorses the Occupational Safety and Health policy of the University of Western Australia. This health and safety manual supplements the main UWA policy to provide and maintain safe and healthy working conditions, equipment and systems of work. To this end, information, instruction, training and supervision is provided as necessary. We will, so far as is reasonably practicable, ensure that no persons are put at risk from activities carried out under the auspices of the University.

The allocation of safety-related duties, the particular arrangements made to implement this policy and the way in which the policy is to be monitored is set out in this manual.

A copy of this statement will be made available to all staff and students via the Faculty of Engineering, Computing and Mathematics’ Workshop website.

Operational health and safety management will be continually monitored and reviewed at least quarterly by a Health and Safety Committee chaired by a member of senior management.

This manual and associated health and safety systems will be kept up to date to take account of changes in local activities.

Reporting processes will be developed and maintained to ensure that relevant information is made available to the Health and Safety Committee, by which the area it is represented.
