WWW2017 - Program overview
WWW2017 is proposed as consisting of four overarching streams as shown below.
Connecting all four streams will be the themes of:
- eLearning on a local and global basis
- The provision of remote services in eHealth, eGovernment and eBusiness
- Data and network security
- Privacy and privacy data-mining
WW2017 - The Festival of the Web

Proposed streams and tracks can consist of many types of content - ranging from tracks within the core technical program, to content provided through workshops and tutorials, special seminars or panel discussions, co-located events, sundowners or social activities.

This is ‘The Festival of the Web’
