Use of “eportfolios” for students to reflect on learning in a project in a Civil Engineering unit and UWA’s plans

Tuesday 16 April 2013
12:30pm – 2:00pm
Oceans Institute Seminar Room G.05

Title: Use of “eportfolios” for students to reflect on learning in a project in a Civil Engineering unit and UWA’s plans.

Speakers

Dr Natalie Lloyd is currently a Senior Lecturer at Curtin University in the Department of Civil Engineering, School of Civil and Mechanical Engineering.

Dr Lloyd has extensive teaching and learning experience in structural engineering and a passion for teaching excellence. Actively integrating new technologies into units and engaging with industry has led to the implementation of an elective unit which utilises electronic portfolios for students to document industry-supported field work.

The portfolios are used as a method of assessment of learning outcomes and collaborative feedback mechanism.

Dr Lloyd's research interests include the scholarship of teaching and learning, in particular, the development of graduate attributes and the role of mentors.

Other established research expertise areas are sustainable materials and practices; especially geopolymer concretes, and precast concrete.

Shannon Johnston is the academic for eLearning at CATL.

Since commencing at UWA in February 2010, she has also been tasked with overseeing the implementation of the new LMS, management of the professional development area and team at CATL, and the selection of additional software systems – an ePortfolio and online conferencing system.

Her interests are in designing for engaging, authentic and purposeful teaching and learning experiences. Current T&L research projects include ePortfolios (with School of Education), developing reflective practitioners (Business), Flipped classrooms (various).

Notes for participants

Please register your attendance to Erin Rummer at email: fase-ecm@uwa.edu.au by 10 April 2013.

Light lunch and refreshments will be provided.
