

Energy and Minerals Research Theme

HALF-DAY WORKSHOP: 16 MAY 2012

The Energy and Minerals Research Theme covers areas from fuels and energy utilization, exploration, mining, minerals extraction, to environment and policy development.

The world as we know it is changing by the minute and we continuously have to discover and develop new and improved ways to fulfil the human need for energy and minerals, all the while conserving our precious planet for generations to come.

The Energy and Minerals Theme provides a platform for both experienced and emerging researchers and research students to share knowledge, ideas and technical skills, and inform their peers about upcoming events.

It allows for greater collaboration opportunities to be identified and different ways of communicating your research to the larger community can be discussed. Sharing knowledge of funding opportunities and applications may lead to increased funding success.

Aims

The aims of the first Energy and Minerals Research Theme workshop are to:

- provide an opportunity for researchers at all levels throughout the Faculty to meet and find out more about related research currently going on in the Faculty;
- identify and discuss collaboration opportunities;
- share information about existing resources available at UWA and funding opportunities in the field; and
- discuss research in Energy and Minerals and how to build the area at UWA.

Speakers

The workshop will be convened by the Theme Leader W/Prof Andy Fourie.

Potential speakers are now invited from research groups within this Theme to give an overview of their group's work, and from individuals on specific topics.

If you wish to give a presentation, please contact Ilse Lorenzen as soon as possible. Speakers will be selected and the program finalised by W/Prof Fourie.

Target Audience

All UWA researchers and their research students working in, or interested in the field of Energy and Minerals, are invited to participate.

Program

Date: 16 May 2012
Time: 12:00pm - 5:00pm
Venue: Case Study Room,
The University Club of WA
Cost: Free to UWA staff and students

The program will comprise invited presentations, a poster session, and a discussion forum. A detailed program will be available closer to the date.

Academic staff and Higher Degree Research students from research groups within this Theme are now invited to register a poster with Ilse Lorenzen.

Registration

In order to register your attendance at this workshop, please contact Ilse Lorenzen by 30 April 2012 at:
Email: ilse.lorenzen@uwa.edu.au
Phone: 6488 4277
